Policies & Procedures

**Policy:** 2225-4- Telework Policy  
**Section:** General Personnel Policies  
**Office/Department:** Human Resources

**Reports To:** DD Admin/General Counsel  
**Contact:** 404-631-1000

The Georgia Department of Transportation recognizes that an employee teleworking program may positively affect the workplace with the potential for increased productivity, enhanced employee recruitment and retention, cost reduction, work/life balance and environmental sustainability. Teleworking may be a viable option for certain employees, dependent upon the employee's position and duties, performance expectations, and availability of a suitable telework location.

The success of GDOT's Teleworking Program depends on effective communication between the employee and the manager/supervisor, as well as with colleagues. It is also essential that the employee can effectively meet all job requirements of his/her position while teleworking. This policy defines the Department's teleworking program (also known as telecommuting) and the guidelines and rules under which it operates. It also provides information to help employees understand the teleworking environment and their associated rights and responsibilities.
